

Tex Grip Textile Adhesive

Type : Aqueous pure acrylic emulsion PSA

Code : TG

This adhesive has been formulated for textile applications where a low initial grab building to a moderate bond is required. The adhesive is resin free and therefore offers excellent clarity and UV resistance.

TYPICAL PROPERTIES	RANGE
Application temperature	+5 → +40°C
Service temperature	-10 → +60°C
Clarity	Excellent
Moisture tolerance	Good
Tack	Low (typ 3N/25mm ²)
Peel strength	Low initial with clean removability, building to a moderate bond
UV resistance	Good
Shelf life	Minimum of two years when stored at 15-25°C; 45-55% RH

NB Textiles

This adhesive is generally suitable for textile applications where good removability without residue is required. However, due to the wide variation of finishes and fabric types available, this product should be tested by the customer to ensure suitability of use.
