

Permanent Adhesive (PVC)

Type : Aqueous compounded acrylic emulsion PSA Code : PP

This adhesive has been designed for paper and filmic laminates and has excellent plasticiser migration tolerance and is particularly suitable for use with PVC. UV resistance is good and the dry film offers excellent clarity. It gives excellent adhesion to difficult surfaces including polyolefin films.

The adhesive also has excellent conversion and ageing characteristics.

TYPICAL PROPERTIES	RANGE
Application temperature	+5 → +40°C
Service temperature	-10 → +80°C
Clarity	Excellent
Moisture tolerance	Good
Tack	High
Peel strength	High
UV resistance	Good
Conversion	Excellent
Shelf life	Minimum of two years when stored at 15-25°C; 45-55% RH
