

Permanent Adhesive (PVC - BS5609)

Type : Aqueous compounded acrylic emulsion PSA Code : BS

This adhesive has been designed for paper and filmic laminates and has excellent plasticiser migration tolerance and is particularly suitable for PVC. UV resistance is good and the dry film offers excellent clarity.

The adhesive also has excellent conversion and ageing characteristics, and passes the British Standard for chemical labelling applications.

TYPICAL PROPERTIES	RANGE
Application temperature	+5 → +40°C
Service temperature	-10 → +80°C
Clarity	Excellent
Moisture tolerance	Good
Tack	High
Peel strength	High
UV resistance	Good
Conversion	Excellent
Shelf life	Minimum of two years when stored at 15-25°C; 45-55% RH

This adhesive is suitable, in conjunction with an approved topstock, for BS5609 applications.

An independent test certificate is available if requested.
