

## Low Tack Repositionable

Type : Aqueous acrylic emulsion PSA

Code : UR

This adhesive has been formulated for repositionable applications where a low initial grab, building to a moderate permanent bond is required. The adhesive has a low resin content and therefore offers good clarity and UV resistance.

| TYPICAL PROPERTIES      | RANGE  |
|-------------------------|--|
| Application temperature | +5 → +40°C   |
| Service temperature     | -10 → +60°C  |
| Clarity                 | Good   |
| Moisture tolerance      | Good   |
| Tack                    | Low (typ 3N/25mm <sup>2</sup> )                        |
| UV resistance           | Good   |
| Shelf life              | Minimum of two years when stored at 15-25°C; 45-55% RH |

**NB** This adhesive is generally suitable for most Book Covering applications where good initial removability without residue is required. However, due to the wide variation of finishes and material types available, this product should be tested by the customer to ensure suitability of use.

Dry film adhesive conforms to the requirements of BS 5665: part 3: 1989 (equivalent to EN71: part 3: 1995) "Safety of Toys, part 3: migration of certain elements".
