

Peelable (Phthalate Free) Adhesive

Type : Aqueous compounded acrylic emulsion PSA Code : PF

This adhesive has been designed for removable labelstock, paper and filmic applications where a clean peelable bond is required. It has been specially formulated to be DOP free and offers excellent stability with chemi-thermal coatings.

The adhesive also has excellent conversion and ageing characteristics.

TYPICAL PROPERTIES	RANGE
Application temperature	+5 → +40°C
Service temperature	-10 → +80°C
Clarity	Good
Moisture tolerance	Good
Tack	Low
Peel strength	Low
UV resistance	N/A
Conversion	Excellent
Shelf life	Minimum of two years when stored at 15-25°C; 45-55% RH

The end user should ensure suitability of this product for specific applications as the adhesive may not readily be removable from certain substrates.

Dry film adhesive conforms to the requirements of BS5665: part 3: 1989 (equivalent to EN71: part 3: 1995) "Safety of Toys, part 3: migration of certain elements".

The ingredients of this adhesive conform to the compositional requirements of either BGA XIV or article 21 CFR 175.105 of the US code of Federal Regulation. **This product is not intended for direct food contact.**
