

Repositionable Adhesive

Type : Aqueous pure acrylic emulsion PSA

Code : RP

This adhesive has been formulated for repositionable applications where a low initial grab building to a permanent bond is required. It is resin free and therefore offers excellent clarity and UV resistance.

TYPICAL PROPERTIES	RANGE
Application temperature	+5 → +40°C
Service temperature	-10 → +60°C
Clarity	Excellent
Moisture tolerance	Good
Tack	Low (typ 3N/25mm ²)
Peel strength	Low initial with clean removability, building to a permanent bond
UV resistance	Good
Shelf life	Minimum of two years when stored at 15-25°C; 45-55% RH

Dry film adhesive conforms to the requirements of BS5665: part 3: 1989 (equivalent to EN71: part 3: 1995) "Safety of Toys, part 3: migration of certain elements".
