

Water-Removable Adhesive

Type : *Aqueous compounded acrylic copolymer
emulsion PSA*

Code : *WS*

This adhesive has been designed for water removable labelstock, paper and filmic applications and is achieved by the re-emulsification of the dry film.

Re-wetting (water temperatures above 10° C) of the adhesive film leads to a high film strength which causes the adhesive to stay adhered to the paper label and allows clean removal of the label from most substrates. This adhesive is not water soluble and is suitable for application to moist surfaces.

TYPICAL PROPERTIES	RANGE
Application temperature	+5 → +40°C
Service temperature	-10 → +80°C
Clarity	Good
Moisture tolerance	Poor
Tack	Good
Peel strength	Good
UV resistance	N/A
Conversion	Excellent
Shelf life	Minimum of two years when stored at 15-25°C; 45-55% RH

The ingredients of this adhesive conform to the compositional requirements of either BGA XIV or article 21 CFR 175.105 of the US code of Federal Regulation.

This product is not intended for direct food contact.
